Sprint 3 Retrospective - Iguana Team

Team 1

Alec Gorge, Manik Kalra, Scott Opell, Andrew Shildmyer, Kirby Kohlmorgen

1. **What went well**
   a. The web app was redesigned to look really nice.
   b. The web app now let's you share songs on Facebook.
   c. The Mac app can scrobble to Last.FM
   d. The server has API's for playlists on the web app, Mac app, and iOS app.
   e. The iOS app has support for authentication, and the UI bugs have been fixed.
   f. The iOS app now has playlists support.
2. **What did not go well**
   a. The idea to have queues for playback wasn't very good and should have been thought through more and eliminated in the backlog
3. **How we should improve**
   a. Communicate better and set internal deadlines on certain items.

      b. Put more time on our estimates, things always take longer than you think.

1. **User story: As a user, I would like to access relisten.net playlists in the iOS app.**
   a. Completed
2. **User story: As a user, I would like to have playlist support in the web app.**
   a. Completed
3. **User story: As a user, I would like to be able to manage playback of music in a reorderable queue in the web app.**

Task Description	Time	Owner	Completed
Add song queue UI to the web app.	8	Andrew	No, a queue for playback doesn't make sense for a live music app
Add javascript to the UI for reordering queued song items.	7	Andrew	
Use localstorage to save the queue.	8	Kirby	
Add the ability to sort by fields.	10	Kirby	

4. **As a sysadmin, I would like one average machine be able to serve 30 req/sec.**
   a. Completed
5. **As a developer, I would like the show reviews to be queryable and stored in a separate table.**
   a. Completed
6. **As a developer, I would like it to be easy to run a local development server.**
   a. Completed
7. **As a user, I would like to be able to manage playback of music in a reorderable queue in the OS X app.**

Task Description	Time	Owner	Completed
Allow queue rows to be reordered by dragging and dropping	6	Alec	No, a queue for playback doesn't make sense for a live music app
Add button to remove from the queue	4	Alec	
Add button to open track in show context	3	Alec	

8. **As a user, I would like to have an easy-to-use, user-friendly OS X interface.**
   a. This story was completed before but I feel it needs to be revisited to account for other changes to the UI

Task Description	Time	Owner	Completed
Remember last show when opening app	4	Alec	No
Fix display and rendering bugs	3	Alec	Yes

9. **As a user, I would like to scrobble to Last.FM from the Mac OS X**
   a. Completed

Backlog

1. As a user, I would like to have the ability to create and share playlists on the iOS app.
2. As a user, I would like to have the option to favorite artists, shows, and songs on the iOS app.
3. As a user, I would like to have the option to favorite artists, shows and songs on the web app.
4. As a user, I would like to be able to cast my music playback to Google Chromecast.
